

REMEDY® & REMEDY SPECTRUM® GV HIP SPACERS

1

Overview

The REMEDY® Hip Spacer and the REMEDY SPECTRUM® GV Hip Spacer are part of the treatment foreseen in a two-stage procedure performed in the event of permanent prosthesis infection. The REMEDY® Hip Spacer implant and the REMEDY SPECTRUM® GV Hip Spacer are intended for temporary use only (180 days or less). The spacer allows basic joint mobility and releases antibiotic into the joint area to protect the implant from bacterial colonization. A second surgery will be required at a later date to remove the REMEDY® Hip Spacer or the REMEDY SPECTRUM® GV Hip Spacer and replace it with a permanent hip joint implant.
